1. Product Requirements Document (PRD)

Purpose: What to build

This is the document you've been creating.

Contains:

- Product Vision
- Features
- Modules
- User Roles
- Dashboards
- Notifications
- Integrations
- Roadmap
- KPIs

---

2. System Flow Document (Core Flow)

This is the most important document for developers.

It explains how every module connects.

Example:

Company Registration

Create Company

Create Branches

Create Departments

Create Designations

Configure Roles

Configure Shift

Configure Leave Policy

Configure Payroll Policy

Import Employees

Start HR Operations

Recruitment Flow

Create Job Requisition

Approval

Publish Job
Receive Applications
Resume Parsing
AI Screening
Recruiter Review
Interview Scheduling
Interview Feedback
Offer Letter
Candidate Accepts

Onboarding

Employee Created

Employee Lifecycle

Candidate

Offer

Onboarding

Employee

Attendance

Payroll

Performance

Training

Promotion

Transfer

Exit

Attendance Flow

Biometric

GPS

Face Scan

QR Code

Attendance Engine

Shift Validation

Late/Early Rules

Overtime

Leave Check

Attendance Report

Payroll

Payroll Flow

Employee

Attendance

Leave

Overtime

Loans

Reimbursements

│

├— Resume Ranking

├— Attrition Prediction

├— Performance Insights

├— Smart Notifications

├— HR Assistant

├— Training Recommendation

├— Workforce Planning

└— Reports

---

3. Database Design (ER Diagram)

This tells developers how everything is connected.

Example:

Company

│

├— Branch

│ │

│ ├— Department

│ │ │

│ │ ├— Employee

│ │ │ │

│ │ │ ├— Attendance

│ │ │ ├— Leave

│ │ │ ├— Payroll

│ │ │ ├— Performance

│ │ │ ├— Assets

│ │ │ ├── Expenses

│ │ │ ├── Training

│ │ │ └── Exit

---

4. Screen Flow (UI Navigation)

This explains every page.

Example:

Login

│

Dashboard

│

├── Recruitment

├── Employees

├── Attendance

├── Leave

├── Payroll

├── Performance

├── Reports

├── Settings

Then:

Recruitment

Dashboard

│

Jobs

│

Candidate

|

Interview

|

Offer

|

Onboarding

Developers understand navigation immediately.

---

5. API Flow

Example:

Mobile App

|

Web Portal

|

REST API

|

Authentication

|

Business Logic

|

Database

|

Notification Engine
